We Charge

Charging **made simple**

E-mobility should be simple. That's why we're offering you smart solutions with We Charge, helping you e-fuel your ID. model at home and on the go across Europe – transparent billing included.

Get the We Charge charging card in just a few easy steps

Would you like to use the We Charge service for charging on the go? It couldn't be easier:

1. Download the We Connect ID. app (iOS/Android)
2. Log in with your Volkswagen user account
3. Select a We Charge charging plan*
4. Receive your We Charge charging card by post and activate it

We Connect ID.

*Electricity contracts must be concluded optionally.
We Charge charging plans are a service provided by the Volkswagen Group Charging GmbH (Elli).

Find and use **public charge points**

With We Charge, you've always got the nearest public charging station on your screen. You can use the app to plan routes along the public charging station network and navigate to available stations. Such as IONITY charging stations, which are available for you to use at special exclusive prices, subject to your We Charge charging plan*.

*Electricity contracts must be concluded optionally.
We Charge charging plans are a service provided by the Volkswagen Group Charging GmbH (Elli).

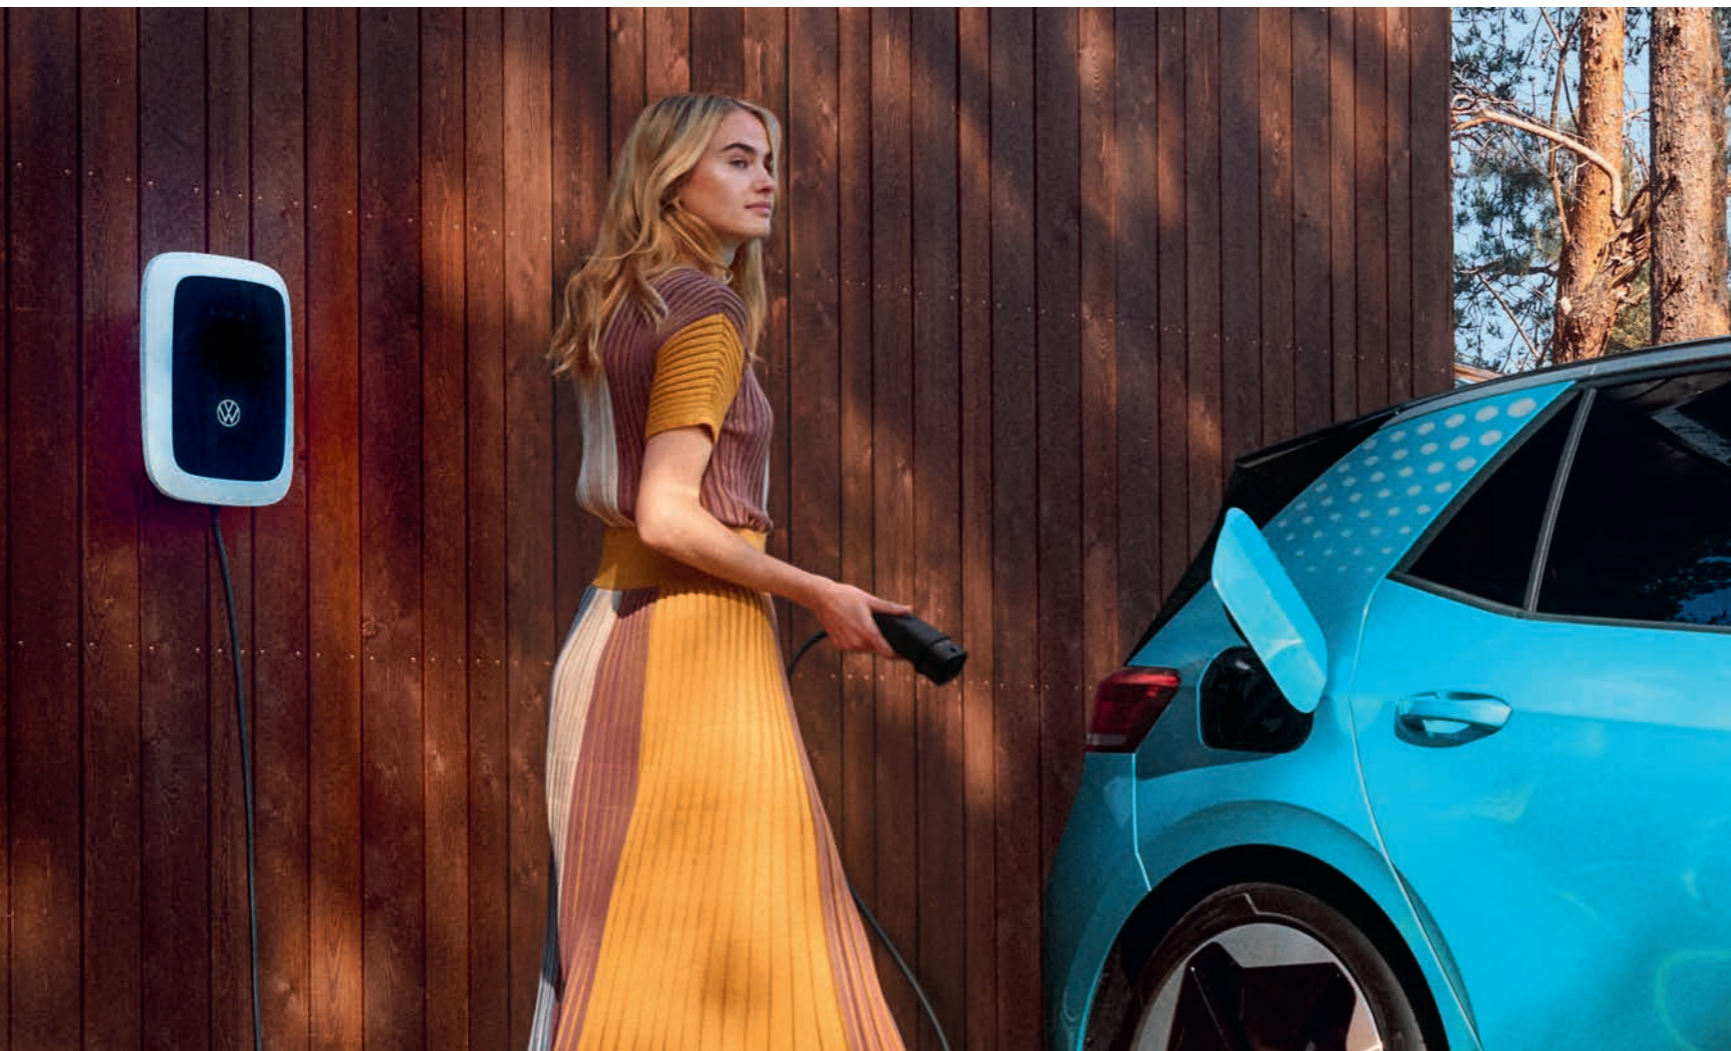

Electricity consumption in kWh/100 km: 15.4-14.5 (combined); CO₂ emissions in g/km: 0; efficiency class: A+

The IONITY high-speed charging network

IONITY offers a growing network of high-speed charging parks along Europe's motorways and major traffic axes – and as an ID. driver, you can enjoy exclusive special prices on the network with the We Charge Go and We Charge charging plans*. Not only do these high-speed charging stations boast exceptionally high power, they are already up to 100% green – where available in the country in question.

More information on IONITY can be found at: www.ionity.eu

*Electricity contracts must be concluded optionally.
We Charge charging plans are a service provided by the Volkswagen Group Charging GmbH (Elli).

Charge at home with ease

Would you like to relax at home while your car charges? With the ID. Charger wall box from Elli, you can take a modern charging concept home with you. An especially handy feature: the connected ID. Charger Connect and Pro models offer smart charging management functions you can remotely control, configure and manage with We Charge.

More details can be found at:
charge.volkswagen-we.com

Our We Charge plans: designed to suit you

For a monthly fee starting at as little as €0, We Charge connects you with public charging stations and offers exclusive special prices for Volkswagen ID. owners. With We Charge Free, We Charge Go and We Charge Plus, there are three charging plans* to choose from which are tailored to a range of different needs – from occasional vehicle users to frequent drivers.

More details can be found at:
charge.volkswagen-we.com

*Electricity contracts must be concluded optionally. We Charge charging plans are a service provided by the Volkswagen Group Charging GmbH (Elli).

We Charge Free Pay as you charge

If you charge at home or work and use your Volkswagen frequently for short trips, start with We Charge Free. The benefit: all e-models and/or hybrid models use the public charging network without monthly fixed costs and recharge ultra-fast at IONITY high-speed charging stations across Europe. It doesn't get easier than that.

We Charge Go

For occasional charging on the go
Do you rent your home, for instance, and charge up your ID. model in town? Do you mostly drive short distances, and go and visit another city at the weekend now and then? Then We Charge Go is right for you. It lets you charge up at public charge points with no extra charging fee and enjoy special prices for IONITY high-speed charging stations as the owner of an ID. with high-speed charging capability.

Fuel consumption l/100 km: combined 2,6; power consumption, kWh/100 km: combined 24.2; CO₂ emissions, g/km: combined 59; efficiency class: A+

We Charge Plus

For frequent chargers and long-distance drives
We recommend We Charge Plus for all owners of an ID. with high-speed charging capability who charge on the go with IONITY more than once a month. For an affordable monthly basic fee, you can charge across Europe for great special prices in our premium partner IONITY's high-speed charging network.

Electricity consumption in kWh/100 km: 15.4-14.5 (combined); CO₂ emissions in g/km: 0; efficiency class: A+

We Connect ID.

We Charge in the **We Connect ID. app**

We Charge is part of the We Connect ID. app and your digital key to the connected ID. charger models Connect and Pro and to one of the largest and fastest growing charging networks in Europe. This makes it easy to add public charge points to the navigation system in your ID. model. Controlling, managing and billing your charging sessions are also just a tap away.

Transparent billing

With We Charge, payment is also easy and transparent with your agreed charging plan*. Before you use a charging station, the specific costs are displayed. When the charging session is complete, you will receive a breakdown of costs incurred in your charging history shortly afterwards. Monthly billing enables additional cost control and transparency.

*Electricity contracts must be concluded optionally. We Charge charging plans are a service provided by the Volkswagen Group Charging GmbH (Eli).

An overview of the **benefits for you**

We Charge offers the right charging solution for every situation – easy, convenient and all in one place. Whether you're at home or on the go. Find out the benefits of easy access to new energy at a glance here.

- Access to one of the largest and fastest growing charging networks in Europe
- Authenticate and charge across Europe with just a charging card
- Find the right We Charge plan* to suit you
- Get exclusive special prices for the IONITY high-speed charging network
- Control and manage ID. Charger Connect and Pro wall boxes remotely
- Get automated billing with monthly invoices and charging statistics
- Use We Charge on your smartphone with the We Connect ID. app or straight from your vehicle as an in-car app in future
